

The VMSx is a compact, full-featured, low cost, high performance softswitch running on a single box server. Providing both wholesale, retail, prepaid postpaid calling card and callshop support, the VMSx is based on our market proven carrier class softswitch. The VMSx is designed to run on affordable hardware while still providing outstanding performance.

Build-in Business Logic Routing Engine is a combination of QoS routing and LCR routing logic that maximize your customer satisfaction and profitability of your company.

VMSx is sold as a CPU based software license with no fixed limit on the number of concurrent calls. You are able to run as many calls as the hardware you provide can support.

A blue rectangular button with rounded corners and a gradient from light blue at the top to a darker blue at the bottom. The word "Download" is centered in white text.
