For over ten years, VSC has developed and delivered products that are at the heart of the new IP based technology that continues to transform the telecom landscape.

VSC provides solutions and guidance to telecom service operators ranging from Tier-1 and Tier-2 Carriers, External Telecommunications Services (ETS) Operations, and International Service Resellers (ISR) to large Enterprise organizations.

Our advanced solutions lower up-front costs and deployment times using state-of-the-art software driven IP based switching solutions.
